

Packaging labels

“Made for Recycling Interzero”-Sign

For printing on white/light backgrounds

For printing on coloured/dark backgrounds

This emblem was developed for labelling recyclable packaging. After a scientifically based packaging analysis by Interzero and the determination of good or very good recyclability of the packaging, it is possible to use the seal.

Printing **always should be done in the colours** Interzero-blue and Interzero-cyan (for colours please see p. 11). If it is not possible to print in colour, the label is printed in black/white. In exceptional cases, the sign can also be embossed or branded. Digital templates are available for the colour variants.

For printing in black/white

For embossing where printing is not possible
